

PROMET MULTI®

Foliar integrator based on microelements with amino acids

CHARACTERISTICS

PROMET MULTI is a nutritional integrator, in a soluble powder, containing free amino acids, microelements, and magnesium.

EFFICACY

- ✓ *Allowed in biological cropping*
- ✓ *Rich complex of microelements*
- ✓ *Elevated quantity of amino acids*
- ✓ *High absorption and biological efficacy*
- ✓ *For foliar and soil applications*

A nondeveloped root system, adverse climatic conditions, calcareous soils with high levels of pH, are the main factors that predispose crops to microdeficiencies, that prevent harmonic vegetative growth and that reduce the yields both in a qualitative way and in a quantitative way.

This particular formulation, characterized by the combined presence of elevated percentages of amino acids, nitrogen and a rich complex of meso and microelements, makes PROMET MULTI especially useful in foliar applications.

PROMET MULTI is needed in vegetative resumption and fast growth, in order to prevent and to cure the pathologies from micro-deficiency since its formulation is characterized by an elevated biological effectiveness. In plants it facilitates the absorption and transport of microelements due to the increased permeability induced by the amino acids. It supplies the crops with nitrogenous organic molecules - the amino acids - ready for use in growth, and carrying out revitalization in the plant.

RESULTS

PROMET MULTI, included in the standard fertilizing programs, is irreplaceable in producing vegetative resumption of debilitated plants, in order to prevent and to cure the most diffuse pathologies due to deficiencies or imbalances of plant nutrients, in order to improve the quality of production.

COMPOSITION

	% w/w
Organic nitrogen (N)	9.0
Organic nitrogen (N) soluble	9.0
Organic carbon (C)	23,5
Magnesium oxide (MgO) soluble in water	4.0
Boron (B) soluble in water	2.0
Copper (Cu) soluble in water	0,1
Iron (Fe) soluble in water	1.0
Manganese (Mn) soluble in water	1.0
Molybdenum (Mo) soluble in water	0,015
Zinc (Zn) soluble in water	1.0

SPECIFICATION Solubility 200 g / lt pH 5 - 7

STATE Powerd

APPLICATION Foliar and soil

DOSES, WAY, TIME OF APPLICATION

Crops	Application rate	N° and time of applications
Fruit trees	Foliar: 200-250 g/hl Soil irrigation: 100-300 g/hl	3-4 applications every 15 days except the blooming period
Olives	Foliar: 250-300 g/hl	
Vegetables, strawberries	Foliar: 150-200 g/hl Soil irrigation: 50-200 g/hl	2-4 applications every 15-20 days beginning from 2 weeks after transplanting
Flowers	Foliar: 200-250 g/hl Soil irrigation: 100-300 g/hl	2 or more applications every 15-20 days beginning after transplanting

PACKAGING 2 kg pail

WARNING PROMET MULTI must be used only if it is necessary. It is very important not exceed advised doses.
It is very important to not use PROMET MULTI in solution with very alkaline chemical compounds, mineral oils, sulphur, polysulphides. If PROMET MULTI is used in a mixture with other products, carry out tests of compatibility on small areas.
The product is stable from +5°C to +35°C. It must be kept in airy, cool, dry places, far from sources of heat/ignition and it must be protected from sunlight.
