

TEROLIGOMIX®

Microelements mixture with magnesium for soil applications and for drip irrigation

CHARACTERISTICS

TEROLIGOMIX is a soluble fertilizer based on microelements, magnesium and sulphur, created for soil applications.

EFFICACY

- ✓ *Balanced mixture of microelements and magnesium*
- ✓ *It prevents and treats the micronutritional deficiencies*
- ✓ *It enhances the green colour*
- ✓ *For soil applications and drip irrigation*

TEROLIGOMIX is a balanced fertilizer made up of the main microelements and enriched with magnesium to increase efficacy and expand possibilities for application.

TEROLIGOMIX, used before seeding (with basal fertilizing and in particular with the contributions of organic substances), provides a needed reserve of essential microelements to satisfy the main physiological and nutritional needs of the plant.

The solubility of the product permits the application in drip irrigation.

RESULTS

TEROLIGOMIX allows preventive and curative interventions, both for applications on soil and for drip irrigation, against micronutritional deficiencies in arboreal, herbaceous and ornamental cultivations.

COMPOSITION

	% w/w
Boron (B) soluble in water	1,2
Copper (Cu) soluble in water	0.5
Iron (Fe) soluble in water	1.0
Manganese (Mn) soluble in water	3.0
Zinc (Zn) soluble in water	1.8
Magnesium oxide (MgO) soluble in water	12.0
Sulphur trioxide (SO ₃) soluble in water	33.2

SPECIFICATIONS

Solubility 285 g / lt pH 3.0 ± 0.5

STATE

Solid

APPLICATION

Soil

DOSES, WAY, TIME OF APPLICATION

Crops	Application rate	N° and time of applications
Fruit trees, citrus tree, vines, olives	Soil preparation-greenhouse: 10 kg/1000 m ² Soil preparation open ground: 50-80 kg/ha Soil application for fruit trees: 50 g/tree Soil irrigation-greenhouse: 50-100 g/ha (4-5 g/m ²) Soil irrigation open ground: 50-100 g/ha (30-50 kg/ha)	2-3 applications for soil irrigation
Vegetables, strawberries		2-3 applications beginning from 2 weeks after transplanting
Flowers		2 or more applications after transplanting

PACKAGING

10 kg bag

NOTES

The application of TEROLIGOMIX is recommended with products based on amino acids or humic extracts (AMINOTON, MIXAMIN, LONITE) to assure a greater absorption of nutritional elements.

WARNING

TEROLIGOMIX must be used only if it is necessary. It is very important not exceed advised doses. It is very important to not use TEROLIGOMIX in a solution with very alkaline chemical compounds, mineral oils, sulphur, polysulphides. If TEROLIGOMIX is used in a mixture with other products, carry out tests of compatibility on small areas.

The product is stable from +5°C to +35°C. It must be kept in airy, cool, dry places, far from sources of heat/ignition and it must be protected from sunlight.
